Mission Statement
To provide quality instruction in a safe, caring environment.

Vision Statement
Every student will graduate from high school, be globally competitive for work or postsecondary education, and be prepared for life in the 21st century.

All programs, activities and facilities of the Caldwell County School System are available to all on a non-discriminatory basis, without regard to race, color, creed, religion, sex, age, handicap, or national origin. The school system is an equal access, Equal Opportunity Employer. Questions pertaining to educational equity, equal opportunity, or equal access should be addressed to the Associate Superintendent for Human Resources.
Caldwell County Middle Schools recognize that the 21st Century presents remarkably different challenges for young adolescents than in the past. We believe that our middle schools are designed for student success. Reflecting recommendations of the Association of Middle Level Educators (AMLE), Caldwell County Middle Schools are developmentally responsive, challenging, empowering, and equitable and exemplify the following characteristics:

**In Curriculum, Instruction, and Assessment:**
- Educators value young adolescents and are prepared to teach them.
- Students and teachers are engaged in active, purposeful learning.
- Curriculum is challenging, exploratory, integrative, and relevant.
- Educators use multiple learning and teaching approaches.
- Varied and ongoing assessments advance learning as well as measure it.

**In Leadership and Organization:**
- A shared vision developed by all stakeholders guides every decision.
- Leaders are committed to and knowledgeable about this age group, educational research, and best practices.
- Leaders demonstrate courage and collaboration.
- Ongoing professional development reflects best educational practices.
- Organizational structures foster purposeful learning and meaningful relationships.

**In Culture and Community:**
- The school environment is inviting, safe, inclusive, and supportive of all.
- Each student’s academic and personal development is guided by an adult advocate.
- Comprehensive guidance and support services meet the needs of young adolescents.
- Health and wellness are supported in curricula, school-wide programs, and related policies.
- The school actively involves families in the education of their children.
- The school includes community and business partners.

**National Middle School Association.** (2010). *This We Believe: Keys to Educating Young Adolescents.*
Westerville, OH: NMSA.
The Importance of Middle Level Education and Young Adolescents

National Middle School Association. (2003). This We Believe: Successful Schools for Young Adolescents. Westerville, OH: NMSA.

Young people undergo more rapid and profound personal changes between the ages of 10 and 15 than at any other time in their lives. Changes occur irregularly, and no two young adolescents enter puberty at the same time or progress at the same rate. Achieving academic success is highly dependent upon their developmental needs being met.

Changes in students’ patterns of thinking become evident in the ideas they have about the world and how it functions. These shifts may be apparent in the questions they ask to each other and trusted adults, in reflections about personal experiences, their views on moral issues, and through their perceptions of the things around them. Because cognitive growth occurs gradually and irregularly, middle school students require ongoing, concrete, experiential learning in order to develop intellectually.

To read more about the developmental needs of 10 – 15 year olds and the goals of Middle Level Education, visit http://amle.org/.

Parent Involvement

As students begin to age and are able to handle more responsibility, parents will often step back and become less involved with their child’s academics. We encourage parents to remain involved in their child’s academic success. The moment you have a concern or question, immediately call your child’s teacher, school counselor or principal.

Should your schedule allow, we encourage you to volunteer at your child’s school. Many opportunities are available for parents to volunteer. It truly takes all of us working together to ensure the success of our students.

We look forward to building a strong school community with you.

The Parent Power publication includes Annual Notices and other items of interest for parents and or guardians. These resources are located on the Caldwell County Schools website. http://sc.caldwellschools.com/education/components/scrapbook/default.php?sectiondetailid=58638
North Carolina Standard Course of Study

The link below will provide you with information on the North Carolina Standard Course of Study. To access the North Carolina Standard Course of Study utilize the following link:
http://www.ncpublicschools.org/curriculum/.

Mathematics
Students will build upon their previous instruction in math by learning the following concepts this year:

- Use Ratios and Rates to Solve Problems
- Dividing Fractions by Fractions
- Compute fluently with multi-digit numbers and find common factors and multiples.
- Rational Number System
- Algebraic Expressions, Equations, and Inequalities
- Independent and Dependent Variables
- Real-world mathematical problems with Area, Surface Area, and Volume.
- Statistical Variability and Distributions

Students will also use Eight Mathematical Practices as outlined by the North Carolina Standard Course of Study
1. Make sense of problems and persevere in solving them.
2. Reason abstractly and quantitatively.
3. Construct viable arguments and critique the reasoning of others.
4. Model with mathematics.
5. Use appropriate tools strategically.
6. Attend to precision.
7. Look for and make use of structure.
8. Look for and express regularity in repeated reasoning

6th Grade Math End of Grade Test information:

<tr>
<td>Statistics and Probability</td>
<td>7 - 12%</td>
</tr>
</tbody>
</table>
ENGLISH LANGUAGE ARTS (Reading, Writing, Speaking/Listening, and Language)
Students will use oral language, written language, media and technology for expressive, informational, argumentative, critical, and literary purposes. Students will also study the structure of language and grammatical rules in order to speak and write effectively. The anchor standards are listed below along with the link for specific strands concerning each grade level.

Anchor Standards
Reading:  http://www.corestandards.org/ELA-Literacy/CCRA/R/
Writing:  http://www.corestandards.org/ELA-Literacy/CCRA/W/
Speaking/Listening:  http://www.corestandards.org/ELA-Literacy/CCRA/SL/
Language:  http://www.corestandards.org/ELA-Literacy/CCRA/L/

Informational text pieces will be emphasized in all classrooms. Text structure (description, cause/effect, problem/solution, sequential, etc.) and text features (bold print, heading, subheading, caption, etc.) are important elements in understanding and breaking apart informational texts. Additionally, there is a strong focus on vocabulary and language, including determining meanings of words and phrases in context.

Citing sources/evidence and providing valid reasoning for arguments will be required of every student writer in every subject area. Proficient writers should be able to organize and present their ideas and arguments in a logical manner. Students will also be required to use correct grammar and spelling in their writing.

The weight distributions for the North Carolina standards are listed in the table below.

<table>
<thead>
<tr>

</tbody>
</table>

Accelerated Reader
Accelerated Reader (AR) is utilized in language arts classrooms to monitor reading comprehension of student self-selected literature, as well as promote strong reading habits. Follow this link to learn more about the AR program:  http://www.renaissance.com/services/parent-resources/
SIXTH GRADE WRITING

Content writing will be practiced throughout the school year in each subject area. Writing tasks should occur in classes on a consistent basis in order to reinforce and assess classroom performance. Constructed response questions, which require students to generate both brief and extended responses, will be used as a part of regular instruction.

Sixth and seventh graders will practice writing through research across multiple content areas. Students will be taught to choose valid sources for information and to cite sources in their writing. Students will produce a local, research-based essay that will be included in the K-12 Writing Portfolio.

In Eighth grade, students will complete a local, research-based writing assessment that will be included in the K-12 Writing Portfolio. Sixth and seventh grade writing will build foundational skills for this project. It is the goal of Caldwell County Schools to strengthen students’ abilities to produce and publish quality written work.

SOCIAL STUDIES

Students in sixth grade will continue to expand the knowledge, skills and understandings acquired in the fourth and fifth grade studies of North Carolina and the United States by connecting those studies to their first formal look at a study of the world. Sixth graders will focus heavily on the discipline of geography by using the themes of location, place, movement, human-environment interaction and region to understand the emergence, expansion and decline of civilizations and societies from the beginning of human existence to the Age of Exploration. Students will take a systematic look at the history and culture of various world regions including the development of economic, political and social systems through the lens of change and continuity. As students examine the various factors that shaped the development of civilizations, societies and regions in the ancient world, they will examine both similarities and differences among these areas. A conscious effort should be made to integrate various civilizations, societies and regions from every continent (Africa, Asia, Europe and the Americas). During this study, students will learn to recognize and interpret the “lessons of history;” those transferable understandings that are supported throughout time by recurring themes and issues. The standards are organized around five strands: history, geography and environmental literacy, economics and financial literacy, civics and government and culture. The strands should not be taught in isolation, but woven together in an integrated study that helps understand the ancient world. ¹

**SCIENCE**

Sixth grade science is based on three instructional domains: Physical (P), Earth (E), and Life (L) Science. Within physical science, students study forces and motion, properties and change of matter, and the conservation and transfer of energy. Earth Science includes the study of earth in the universe and earth systems, structures and processes. Life science includes ecosystems and the structures and functions of living organisms.

Science will be taught using inquiry-based instruction in order to help students build conceptual understandings of topics. Students will engage in scientific investigation and will use reasoning and problem-solving to demonstrate how science is constant, historic, probabilistic, and replicable. Science as Inquiry provides for “hands on/minds on” student activities and encourages students to think like scientists.

**INFORMATION and TECHNOLOGY ESSENTIAL STANDARDS**

Standards for Information and Technology will be used throughout all content areas.
- Students will learn to analyze resources for relevance, reliability, bias, and intent of information.
- Students will use technology to gather, analyze, and present data.
- Students will learn to apply the research process to gather information and to properly cite sources of information.
- Students will apply responsible behaviors when using information and technology sources.

Effective use of the Information and Technology Essential Standards will become increasingly important for students as we move toward future assessments of the North Carolina Standard Course of Study.

**HEALTHFUL LIVING**

The focus areas for students in this grade level include the following focus areas: mental and emotional health, personal and consumer health, interpersonal communication and relationships, nutrition and physical activity, and alcohol, tobacco, and other drugs.

The accompanying objectives and curriculums can be found at:
Student Accountability Standards

The state’s Student Accountability Standards brought accountability measures for schools and families. The standards are designed to improve student achievement and increase the number of students performing at grade level. For this plan to work, however, parents must remain involved in and informed about their child’s education. The standards for accountability are important because they promote:

- higher expectations for students and teachers as well as higher student achievement
- the opportunity for every student in North Carolina to receive a sound basic education
- an emphasis on workplace skills as being crucial for a student’s future success
- For additional information about the North Carolina Testing Program, visit the Accountability Services Division website at [http://www.ncpublicschools.org/accountability/](http://www.ncpublicschools.org/accountability/).

Benchmarks and Universal Screenings

Caldwell County Schools will have Schoolnet Benchmark Assessments and/or NC Check-Ins this school year for students in grades six through eight. The Benchmark Assessments will assess students on the current English Language Arts and Mathematics Curriculum for grades six through eight and the Science Curriculum for grade eight. Schools have been given a window of time to complete these assessments. Students will also take part in STAR Reading and Math assessments throughout the year. These assessments help teachers utilize data to drive instruction as part of the Multi-Tiered Systems of Support (MTSS) framework.

End of Grade Tests (EOGs)

Based on the North Carolina Standard Course of Study, state required End of Grade (EOGs) Tests, are given in May. EOGs are designed with an emphasis on assessing mastery of skills and higher level thinking skills. These assessments are used to ensure students are working at grade level in reading and math in grades 3-8. It is the goal of the state and CCS that all students score level III or higher. Student proficiency on the EOGs is scored at five levels:

- Level I - Students have limited command of knowledge and skills.
- Level II – Students have partial command of knowledge and skills.
- Level III – Students have sufficient command of knowledge and skills.
- Level IV – Students have solid command of knowledge and skills.
- Level V – Students have superior command of knowledge and skills.

Examples of EOG test questions:
[http://www.ncpublicschools.org/accountability/testing/releasedforms](http://www.ncpublicschools.org/accountability/testing/releasedforms)
NC Final Exams in Science and Social Studies

The NC Final Exams in selected subjects and grades are part of the NC State Testing Program and measure growth in various subjects and grades. The goal is to capture students’ knowledge and skills in an authentic way.

Assessment specifications files for the North Carolina Final Exams provide greater detail on the assessments, including background information, the prioritization of the standards, cognitive rigor, item complexity, item types, and assessment delivery modes. The following links will provide the exact information aligned to each NC Final Exam.

Middle School Attendance Policy

Attendance in school and participation in class are integral parts of academic achievement and the teaching-learning process. Through regular attendance, students develop patterns of behavior essential to professional and personal success in life. Regular attendance by every student is mandatory. The State of North Carolina requires that every child in the State between the ages of 7 (or younger if enrolled) and 16 attend school. Parents and legal guardians are responsible for ensuring that students attend and remain at school daily.

MIDDLE SCHOOL (6-8) ATTENDANCE REQUIREMENTS

A. Attendance

In preparing students for the rigors of middle school and successful entry into high school, attendance is fundamental. The primary responsibility of school attendance rests with students and their parents, guardians, or custodians. In order to maintain a consistent academic environment, there will be consequences for excessive unexcused absences, tardies, and early dismissals. As stated previously, the principal may require documentation to verify reasons for absences.

A student in grades six through eight must be in attendance at least 94.4% of the school year or 170 days. Students having more than ten (10) unexcused absences may not be promoted to the next grade level.

The school attendance committee will review student absences at the end of the first three grading periods and in the middle of the last grading period. The attendance committee
will submit, to the principal or his/her designee, the names of students who are in danger of not being promoted due to excessive unexcused absences.

B. Reporting Absences
1. After the third unexcused absence, the principal or designee will notify the student’s parent, guardian or custodian of the excessive absences.

2. After the sixth unexcused absence, the principal or designee will notify the students’ parents, guardian or custodian of the excessive absences and refer the student to the school social worker.
   A. The school social worker will investigate the cause of the unexcused absences and provide intervention as needed.
   B. The student will also be referred to the school’s Student Success Team. In coordination with the school’s Student Success Team, the school social worker will continue to monitor student attendance.

3. After the tenth unexcused absence, the principal, in consultation with the school social worker and other members of the school’s Student Success Team, will refer the student and his/her family to an outside intervention agency and may file a complaint with the juvenile court counselor pursuant to Chapter 7B of the General Statutes that the child is habitually absent from school without a valid excuse. Also note, the principal or social worker may notify the district attorney or director of social services, of the county where the child resides, if absences become extremely excessive. Students in danger of not being promoted due to missing the maximum number of days stated above will be reviewed by the school attendance committee. Each school will determine the consequences for students in excess of ten (10) unexcused absences.
